

# APC-E54 Charging Cabinet

## & Advantages:

1. 8S security protection system( China unique manufacturer using this chips with 8S protection system to make sure the higher security of the charging cart)
2. Chips are imported which has higher quality guarantee to make sure the good quality
3. Using galvanized sheet as the main materials, which can make the charging cabinet much more beautiful
4. With the German medical ultra-quiet universal wheels to make sure its low noise during moving.

## & 8S Security Protection System

 The heart of security

8S protection system more **security**8S

## & Characters

1. Support 54 tablets charging simultaneously
2. 1.0-2.0mm thick galvanized plate is used, cabinet body's front uses bisect door design, single handle lock is used for opening and closing, and safe grounding lock is set on the bottom of equipment; double color design of gray and black, looking more colorful.
3. Cabinet upper uses arc design, and avoids collision; beautiful and practical;
4. The circuit board module adopts semiconductor chip imported from famous brands manufacturer of the world, achieve small size low fever, optimal power design, and with

various protection function, conforms to ROHS required, The rated output voltage and current of each USB are 5V and 2.4A; each USB supports over-current protection. Green light turns on when full charge and in standby, red light turns on during failure; it has short circuit, overload, over-current, over-temperature, anti-surge and lightning protection so as to ensure personal safety of operator;

5. Pad placing area is set with ABS engineering plastic inter-layers for placing PAD by different layers so as to prevent scratching effectively;

6. Cabinet inside has good ventilation, at least two cooling fans are set to make system inside form cooling convection, to ensure exhaust flow; it has temperature test system and warning function, and gives timely warning when temperature exceeds setting value;

7. Five-hole socket is set outside the cabinet for the convenience of external equipment; it has two 5V, 2.4A USB; press independent switch before use, and power off this switch after use. Power switch has high voltage fuse and power-on indication function, and leakage protector is set in cabinet so as to ensure personal safety of operator;

8. Super silent shock absorbing steering wheel (with braking function) is installed below cabinet for the convenience of movement by operator.

9. Qualification: CCC、 CE、 FCC、 RoHS、 ISO, etc.
